# IMPORTANT SAFETY INSTRUCTIONS

# **YOUR SAFETY AND THAT OF OTHERS IS PARAMOUNT**

This manual and the appliance itself provide important safety warnings, to be read and observed at all times

All safety warnings are preceded by the danger symbol and the following terms: This is the danger symbol, pertaining to safety, which alerts users to potential risks to themselves and others.

Indicates a hazardous situation which, if not avoided, will cause serious injury.

### WARNING

Indicates a hazardous situation which, if not avoided, could cause serious injury.

shock resulting from improper use of the appliance. Carefully observe the following instructions: All safety warnings give specific details of the potential risk present and indicate how to reduce risk of injury, damage and electric

- The appliance must be disconnected from the power supply before carrying out any installation work
- instructions and local safety regulations. Do not repair or replace any part of the appliance unless specifically stated in the Installation and maintenance must be carried out by a qualified technician, in compliance with the manufacturer's
- Regulations require that the appliance is earthed
- The power cable must be long enough for connecting the appliance, once fitted in its housing, to the power supply
- mm must be utilized. For installation to comply with current safety regulations, an all-pole disconnect switch with minimum contact gap of 3
- Do not use multiple plug adapters or extension leads.
- Do not pull the power supply cable in order to unplug the appliance.
- The electrical components must not be accessible to the user after installation.
- Do not touch the appliance with any wet part of the body and do not operate it when barefoot.
- heating rooms). The Manufacturer declines all responsibility for inappropriate use or incorrect setting of the controls This appliance is designed solely for use as a domestic appliance for cooking food. No other type of use is permitted (e.g.:
- responsible for their safety without experience and knowledge of the appliance, unless supervised or previously instructed in its use by those The appliance is not intended for use by persons (including children) with any physical, sensory or mental impairment, or
- appliance and supervised to ensure that they do not play with it. The accessible parts of the appliance may become very hot during use. Young children should be kept away from the
- During and after use, do not touch the heating elements or interior surfaces of the appliance risk of burns. Do not allow the appliance to come into contact with cloths or other flammable materials until all the components have cooled
- Do not obstruct the vent apertures. before accessing the oven. When the appliance door is shut, hot air is vented from the aperture above the control panel. At the end of cooking, exercise caution when opening the appliance door, letting the hot air or steam exit gradually
- Use oven gloves to remove pans and accessories, taking care not to touch the heating elements.
- Do not place flammable materials in or near the appliance: a fire may break out if the appliance is inadvertently switched
- explode, damaging the appliance. Do not heat or cook sealed jars or containers in the appliance. The pressure that builds up inside might cause the Jar to
- Do not use containers made of synthetic materials.
- Overheated oils and fats catch fire easily. Always remain vigilant when cooking foods rich in fat and oil
- Never leave the appliance unattended during food drying.
- temperatures. As a result, there is a risk that vapours released by the alcohol may catch fire upon coming into contact with If alcoholic beverages are used when cooking foods (e.g. rum, cognac, wine), remember that alcohol evaporates at high electrical heating element

## Scrapping of household appliances

- regulations. Before scrapping, cut off the power supply cable This appliance is manufactured with recyclable or reusable materials. Dispose of it in accordance with local waste disposal
- competent local authority, the collection service for household waste or the store where you purchased the appliance For further information on the treatment, recovery and recycling of household electrical appliances, contact you

### INSTALLATION

from its polystyrene foam base at the time of installation. After unpacking the oven, make sure that it has not been damaged during transport and that the oven door closes properly. In the event of problems, contact the dealer or your nearest After-sales Service. To prevent any damage, only remove the oven

## PREPARING THE HOUSING UNIT

- Kitchen units in contact with the oven must be heat resistant (min 90°C).
- Carry out all cabinet cutting work before fitting the oven in the housing and carefully remove all wood chips and sawdust.
- After installation, the bottom of the oven must no longer be accessible.
- For correct appliance operation, do not obstruct the minimum gap between the worktop and the upper edge of the oven.

## **ELECTRICAL CONNECTION**

edge of the oven (visible when the door is open). Make sure the power voltage specified on the appliance dataplate is the same as the mains voltage. The dataplate is on the front

authorized service centre. Power cable replacement (type H05 RR-F 3 x 1.5 mm<sup>2</sup>) must be carried out by a qualified electrician. Contact an

## GENERAL RECOMMENDATIONS

### Before use

- Remove cardboard protection pieces, protective film and adhesive labels from accessories.
- insulating materials and protective grease. Remove the accessories from the oven and heat it at 200° for about an hour to eliminate the smell and fumes from the

### **During use:**

- Do not place heavy objects on the door as they could damage it.
- Do not cling to the door or hang anything from the handle
- Do not cover the inside of the oven with aluminium foil.
- Never pour water into the inside of a hot oven; this could damage the enamel coating.
- Never drag pots or pans across the bottom of the oven as this could damage the enamel coating
- Make sure that the electrical cables of other appliances do not touch hot parts of the oven or become trapped in the door.
- Do not expose the oven to atmospheric agents.

# SAFEGUARDING THE ENVIRONMENT

## Disposal of packing material

therefore be disposed of responsibly and in full compliance with local authority regulations governing waste disposal. The packing material is 100% recyclable and is marked with the recycle symbol (23). The various parts of the packing must

## Scrapping the product

- (WEEE). This appliance is marked in compliance with European Directive 2002/96/EC, Waste Electrical and Electronic Equipment
- environment and human health, which could otherwise be caused by inappropriate waste handling of this product By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the
- domestic waste but must be taken to an appropriate collection centre for the recycling of electrical and electronic The symbol  $\overline{\underline{\mathbb{X}}}$  on the product or on the accompanying documentation indicates that it should not be treated as

### Energy saving

- Only pre-heat the oven if specified in the cooking table or your recipe
- Use dark lacquered or enamelled baking moulds as they absorb heat far better.
- once the oven is switched off. Switch the oven off 10/15 minutes before the set cooking time. Food requiring prolonged cooking will continue to cook even

# **DECLARATION OF CONFORMITY ( 6**

This oven, which is intended to come into contact with foodstuffs, complies with European Regulation (⟨€) n.1935/2004 and has been designed, manufactured and sold in conformity with the safety requirements of the "Low Voltage" directive 2006/95/CE (which replaces 73/23/CEE and subsequent amendments), the protection requirements of "EMC" 2004/108/

## TROUBLESHOOTING GUIDE

## The oven does not work:

- Check for the presence of mains electrical power and if the oven is connected to the electrical supply.
- Turn off the oven and restart it to see if the fault persists.

## The door will not open:

- Turn off the oven and restart it to see if the fault persists.
- cycle of ovens with pyrolysis function"). Important: during self-cleaning, the oven door will not open. Wait until it unlocks automatically (see paragraph "Cleaning

# The electronic programmer does not work:

number that follows the letter "F". If the display shows the letter "F" followed by a number, contact your nearest After-sales Service. Specify in this case the

## **AFTER-SALES SERVICE**

# **Before calling the After-Sales Service:**

- See if you can solve the problem yourself with the help of the suggestions given in the "Troubleshooting guide"
- Switch the appliance off and back on again it to see if the fault persists.

If after the above checks the fault still occurs, get in touch with the nearest After-sales Service

Always specify:

- a brief description of the fault;
- the type and exact model of the oven;
- (visible when the oven door is open). The service number is also indicated on the guarantee booklet, the service number (number after the word Service on the rating plate), located on the right hand edge of the oven cavity
- your full address;
- your telephone number.

## SERVICE 0000 000 00000

and repairs carried out correctly). If any repairs are required, please contact an authorised After-sales Service (to guarantee that original spare parts will be used

### CLEANING

1 1

- Never use steam cleaning equipment.
- Only clean the oven when it is cool to the touch.
- Disconnect the appliance from the power supply.

### Oven exterior

IMPORTANT: do not use corrosive or abrasive detergents. If any of these products accidentally comes into contact with

the appliance, clean immediately with a damp cloth.

Clean the surfaces with a damp cloth. If it is very dirty, add a few drops of washing up detergent to the water. Finish off with a dry cloth.

### Oven interior

and the oven door glass. IMPORTANT: do not use abrasive sponges or metallic scrapers or scourers. Over time, these can ruin enamelled surfaces

- stains caused by food residues (e.g. food with a high sugar content). After every use, allow the oven to cool then clean it preferably while it is still warm in order to remove built-up dirt and
- Use proprietary oven detergents and follow the manufacturer's instructions to the letter.
- MAINTENANCE). Clean the door glass with a suitable liquid detergent. The oven door can be removed to facilitate cleaning (see
- on the inside of the door and around the seal. When the oven is cold, dry the inside of the door with a cloth or sponge. N.B.: during prolonged cooking of foods with a high water content (e.g. pizza, vegetables, etc.) condensation may form The top heating element of the grill (see MAINTENANCE) can be lowered (some models only) to clean the roof of the oven

### Accessories:

- Soak the accessories in water with washing up detergent immediately after use, handling them with oven gloves if still
- Food residues can be easily removed using a brush or sponge.

# Cleaning the rear wall and catalytic side panels of the oven (if present):

damage the catalytic surface and ruin its self-cleaning properties. IMPORTANT: do not use corrosive or abrasive detergents, coarse brushes, pot scourers or oven sprays which could

- Operate the oven empty with the fan-assisted function at 200°C for about one hour
- Next, leave the appliance to cool down before removing any food residue with a sponge

# Cleaning cycle of ovens with pyrolysis function (if present):

- Do not touch the oven during the pyrolysis cycle.
- Keep children away from the oven during the pyrolysis cycle

cooking select the pyrolysis function after every use, only when the oven is very dirty or produces smoke or fumes while preheating or temperature, the deposits turn into a light ash which can be easily wiped away with a damp cloth, when the oven is cool. Do not This function burns off spatters produced inside the oven during cooking at a temperature of approx. 500°C. At this high

- cleaning (pyrolysis) function. If the oven is installed below a hob, make sure that all burners or electric hotplates are switched off during the self-
- Remove all accessories before running the pyrolysis function.
- The appliance is equipped with 2 pyrolysis functions:
- Select it at regular intervals (after cooking meat on 2 or 3 consecutive occasions). Energy-saving cycle (PYRO EXPRESS/ECO): which consumes approximately 25% less energy than the standard cycle
- 5 Standard cycle (PYRO): which is suitable for cleaning a very dirty oven.
- you to run a self-cleaning cycle. In any case, after a certain number of uses and depending on how dirty the oven is, a message on the oven display advises

oven has returned to an acceptably safe level. N.B.: during the pyrolysis function, the oven door will not open; it will remain locked until the temperature inside the

### MAINTENANCE

- Use safety gloves.
- 1 1 Ensure the oven is cold before carrying out the following operations.
- Disconnect the oven from the power supply.

### REMOVING THE DOOR

### To remove the door:

- Open the door fully.
- Lift the catches and push them forwards as far as they will go (fig. 1).
- 'n Close the door as far as it will go (A), lift it up (B) and turn it (C) until it is released (D) (fig. 2).

### To refit the door:

- Insert the hinges in their seats.
- Open the door fully.
- Lower the two catches.
- Close the door.

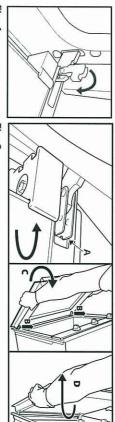

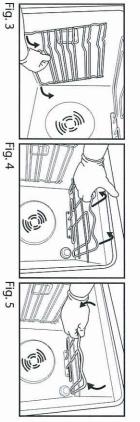

Fig. 1

Fig. 2

# **MOVING THE TOP HEATING ELEMENT (SOME MODELS ONLY)**

- Remove the side accessory holder grilles (Fig. 3).
- Pull the heating element out a little (Fig. 4) and lower it (Fig. 5).
- To reposition the heating element, lift it up, pulling it slightly towards you, making sure it comes to rest on the lateral

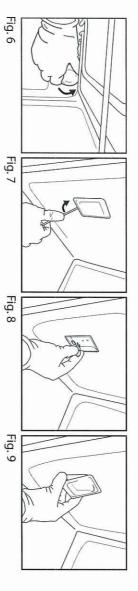

## REPLACING THE OVEN LAMP

## To replace the rear lamp (if present):

- Disconnect the oven from the power supply.
- Unscrew the lamp cover (Fig. 6), replace the lamp (see note for lamp type) and screw the lamp cover back on.
- Reconnect the oven to the power supply.

## To replace the side lamp (if present):

- Disconnect the oven from the power supply.
- Remove the side accessory holder grilles, if present (Fig. 3).
- Ÿ Use a screwdriver to prise off the lamp cover (Fig. 7).
- Replace the lamp (see note for lamp type) (Fig. 8).
- 5.4 Reposition the lamp cover, pushing it on firmly until it snaps into place (Fig. 9).
- Refit the side accessory holder grilles.
- Reconnect the oven to the power supply.

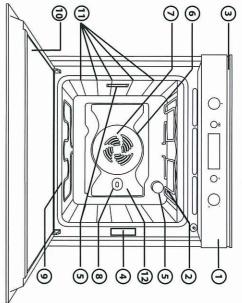

#### N.B.:

- Lamps are available from our After-sales Service. Only use 25-40W/230V type E-14, T300°C incandescent lamps, or 20-40W/230 V type G9, T300°C halogen lamps.
- IMPORTANT:

- If using halogen lamps, do not handle with bare hands since fingerprints can damage them. Do not use the oven until the lamp cover has been repositioned.

## **INSTRUCTIONS FOR OVEN USE**

# FOR ELECTRICAL CONNECTION, SEE THE PARAGRAPH ON INSTALLATION

- Control panel
- Upper heating element/grill
- Cooling fan (not visible)
- Dataplate (not to be removed)
- Light

- **BUTTON (c):** to select and confirm settings

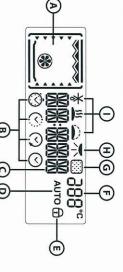

### LIST OF FUNCTIONS

submenus. Turn the "Functions" knob to any position and the oven switches on: the display shows the functions or the associated

**AUTOMATIC CLEANING** The submenus are available and selectable by turning the knob to the functions GRILL, SPECIAL, SETTINGS, BREAD/PIZZA,

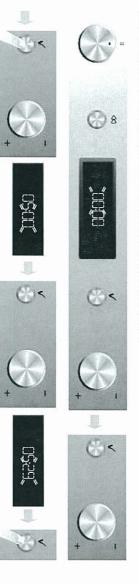

NOTE: for the list and description of functions, see the specific table at page 12.

## **DESCRIPTION OF DISPLAY**

- Display of heating elements activated during the various cooking functions
- Time management symbols: timer, cooking time, end of cooking time, time
- . Information regarding selected functions
- D. Automatic BREAD/PIZZA function selected
- m Indication of door locked during automatic cleaning cycle (pyro-cleaning)
- Internal oven temperature
- Pyro-cleaning function
- **1.** Browning
- Special functions: defrosting, warm keeping, rising

# STARTING THE OVEN - SETTING THE TIME

After connecting the oven to the mains power, the time must be set on the clock. The two hour digits flash on the display.

- 1. Turn the "Browse" knob to display the correct hour.
- Press the button 🕑 to confirm; the two minute digits flash on the display.
- Turn the "Browse" knob to display the correct minutes.
- 4. Press button **(()** to confirm.

To change the time, for example following a power cut, see the next paragraph (SETTINGS).

## **SELECTING COOKING FUNCTIONS**

- Turn the "Functions" knob to the desired function: the cooking settings are shown on the display.
- If the values shown are those desired, press ②. To change them, proceed as indicated below.

# SETTING THE TEMPERATURE/OUTPUT OF THE GRILL

To change the temperature or output of the grill, proceed as follows:

- . Turn the "Browse" knob to display the desired value.

The oven automatically confirms your selection 10 seconds after the last operation.

### **FAST PREHEATING**

- .\_ Turn the "Functions" knob to the symbol  $\mathbb{H}^2$  to select the fast preheating function.
- 2. Confirm by pressing ②: the settings are shown on the display.
- Ψ If the proposed temperature is that desired, press button  $\bigcirc$ . To change the temperature, proceed as described in previous conventional function paragraphs. The message PRE appears on the display. When the set temperature is reached, the corresponding value (e.g. 200°C) appears on the display and the acoustic signal sounds. At the end of preheating, the oven automatically selects the
- At this point food can be placed in the oven for cooking.
- If you wish to set a different cooking function, turn the "Functions" knob and select the desired function

## SETTING COOKING TIME

the selected function, after which the oven switches off automatically. This function can be used to cook food for a set length of time, from a minimum of 1 minute to the maximum time allowed by

- 1. Once the temperature is confirmed, the symbol ( ; flashes.
- 2. Turn the "Browse" knob to display the desired cooking time.
- 3. To confirm the cooking time, press button  $\bigcirc$ .

The oven automatically confirms your selection 10 seconds after the last operation.

# **SETTING END OF COOKING TIME / DELAYED START**

longer than stated in the cooking table. N.B.: with this setting, the selected temperature is reached in a more gradual way, so cooking times will be slightly IMPORTANT: the start delayed setting is not available for the following functions: FAST PREHEATING, BREAD/PIZZA.

be done once cooking time has been set. The end of cooking time can be set, delaying the start of cooking by up to a maximum of 23 hours and 59 minutes. This can only

After setting cooking time, the display shows the end of cooking time (for example 15:45) and the symbol ( ) flashes

To delay the end of cooking time, and thus also the cooking start time, proceed as follows:

- Turn the "Browse" knob to display the time you wish cooking to end (for example 16:00).
- has been made correctly. Confirm the selected value by pressing button  $\odot$  : the two dots of end of cooking time flash, indicating that the setting
- The oven will automatically delay the start of cooking so as to finish cooking at the set time

followed by the "Browse" knob to change values and button  $\bigodot$  to confirm. At any time, however, set values (temperature, grill setting, cooking time) can be changed using button 🚳 to go back

# INDICATION OF THE RESIDUAL HEAT INSIDE THE OVEN

word HOT and the current temperature. When the residual heat reaches 50°C, the display shows the current time again. If at the end of cooking, or when the oven is switched off, the temperature inside the oven is over 50°C, the display shows the

#### TIMER

The maximum time which can be set is 23 hours and 59 minutes. This function can be used only with the oven switched off and is useful, for example, for monitoring the cooking time of pasta

- With the "Functions" knob at zero, turn the "Browse" knob to display the desired time.
- Press button  $\odot$  to start the countdown. When the set time has elapsed, the display will show "00:00:00" and an acoustic signal will sound. To mute the acoustic signal, press button  $\bigcirc$  (the time of day appears on the display).

## SELECTING SPECIAL FUNCTIONS

Turn the "Functions" knob indicator to the symbol セチ to access a submenu containing three special functions.

To browse, select and start one of these functions, proceed as follows:

- Turn the "Functions" knob to symbol 大子: the display shows "DEFROST" along with this function's corresponding symbol.
- Turn the "Browse" knob to scroll the list of functions; the function names are in English: DEFROST, WARM KEEPING, RISING.
- Press button (v) to confirm.

### BROWNING

when cooking time has been set. At the end of cooking, with certain functions, the display indicates the possibility of browning. This function can only be used

browning cycle. This function can be selected consecutively a maximum of twice. At the end of cooking time, the display shows: "PRESS 🗸 TO BROWN". Press button 🕝, and the oven starts a 5-minute extra-

## **BREAD/PIZZA FUNCTION SELECTION**

"bread" and "pizza". Turn the "Functions" knob indicator to the symbol 🍣 to access a submenu containing two automatic cooking functions for

#### Bread

- Turn the "Functions" knob to symbol 🛞 : the display shows "BREAD" and AUTO at the side
- Turn the "Browse" knob to set the required temperature (between 180°C and 220°C) and confirm with button  $\odot$
- Turn the "Browse" knob to set the required cooking duration and press 🕜 to start cooking.

#### Pizza

- Turn the Functions knob to symbol 😸 : the display shows "BREAD". To select the "PIZZA" function, proceed as follows:
- 2. Turn the "Browse" knob: "PIZZA" appears on the display.
- 3. Press (v) to select the function.
- Turn the "Browse" knob to set the required temperature (between 220°C and 250°C) and confirm with button  $\odot$
- Turn the "Browse" knob to set the required cooking duration and press 🕑 to start cooking.

### SETTINGS

changed. Turn the "Functions" knob indicator to the symbol 🥳 to access a submenu containing four display settings which can be

#### CIOCK

previous paragraph (SETTING THE TIME) Turn the "Functions" knob to the symbol 🥳 : the word CLOCK appears on the display. To change the time of day, see the

#### ECO

To view information on the display, simply press a button or turn a knob. With the ECO mode selected (ON), the display switches off when the oven is on standby or 5 minutes after the end of cooking

- Turn the "Browse" knob to display "ECO".
- .. Press (v) to access the setting (ON/OFF).
- Turn the "Browse" knob to select the desired setting and confirm by pressing button 🕝

### Acoustic signal

To activate or deactivate the acoustic signal, proceed as follows:

- Turn the "Browse" knob to display "SOUND".
- . Press  $\bigodot$  to access the setting (ON/OFF).
- Turn the "Browse" knob to select the desired setting and confirm by pressing button ②.

### **Brightness**

To change the display brightness, proceed as follows:

- Turn the "Browse" knob to display "BRIGHTNESS".
- .. Press button ⊘: number 1 appears on the display.
- Turn the "Browse" knob to increase or decrease brightness and confirm by pressing 🕢

## **AUTOMATIC OVEN CLEANING**

For the description of this function, see the chapter CLEANING and the functions table at page 12

To activate the oven's automatic cleaning cycle (pyro-cleaning), proceed as follows:

- Turn the "Functions" knob to symbol (X): the word PYRO appears on the display
- Press button  $\bigodot$  to confirm your choice and start the pyro-cleaning cycle.

the shorter programme. To select ECO pyro-cleaning, turn the "Browse" knob: the word ECO appears bottom right on the display. Press button 🕑 to start

to a safe temperature, the symbol 🕣 switches off and the display shows "END". at the end of the cleaning cycle: "COOL" appears on the display, indicating the oven is still cooling down. When the oven cools During pyro-cleaning, the oven door is automatically locked and the symbol 🕣 appears on the display. The door remains locked

### KEY-LOCK

This function can be used to lock the buttons and knobs on the control panel.

case, however, the previously selected function will have to be set again. above procedure. When the key-lock function is activated, the oven can be switched off by turning the knob to 0 (zero). In this are locked and the display shows a key symbol. This function can also be activated during cooking. To deactivate it, repeat the To activate it, press 🕲 and 🕑 at the same time for at least 3 seconds. When activated, the functions associated with the buttons

# FUNCTION DESCRIPTION TABLE

	×	36			1					E\$		:\\	0	
P	AI	BR	10	7		Ţ.	2	Ç		SPECIAL				
FAST PREHEATING	AUTOMATIC OVEN CLEANING	BREAD/PIZZA	SETTINGS	TURBO GRILL	GRILL	FORCED AIR	CONVECTION BAKE	CONVENTIONAL	RISING	KEEP WARM	DEFROSTING	LAMP	OFF	
To preheat the oven rapidly.	To burn off spatters produced during cooking with an extremely high temperature cycle (approx. 500°). Two auto-cleaning cycles are available: a complete cycle (PYRO) and a shorter cycle (ECO). The complete cycle is best used only in the case of very dirty ovens, while the shorter cycle should be used at regular intervals.	To bake different types and sizes of bread and pizza. This function contains two programmes with predefined settings. Simply indicate the values required (temperature and time) and the oven will manage the cooking cycle automatically. Place the dough on the 2nd shelf after preheating the oven.	For the display settings (time, brightness, volume of acoustic signal, energy saving function).	To roast large joints of meat (legs, roast beef, chickens). Position the food on the middle shelves. Use the drip tray to collect the cooking juices. Position it on the 1st/2nd shelf, adding approx. half a litre of water. The oven does not have to be preheated. During cooking the oven door must remain closed. With this function you can also use the turnspit, if provided.	To grill steak, kebabs and sausages; to cook vegetables au gratin and toast bread. Place food on the 4th or 5th shelf. When grilling meat, use the drip tray to collect the cooking juices. Position it on the 3rd/4th shelf, adding approx. half a litre of water. The oven does not have to be preheated. During cooking the oven door must remain closed.	To cook a variety of food requiring the same cooking temperature on two shelves at the same time(e.g fish, vegetables, cakes). This function can be used to cook different foods without odours being transferred from one food to another. Use the 3rd shelf to cook on one shelf only. To cook on two shelves, use the 1st and 4th levels after preheating the oven.	To cook meat and pies with liquid filling (savoury or sweet) on a single shelf. Use the 3rd shelf. Preheat the oven before cooking.	To cook any kind of dish on one shelf only. Use the 3rd shelf. To cook pizza, savoury pies and sweets with liquid fillings, use the 1st or 2nd shelf. Preheat the oven before placing food inside.	For optimal rising of sweet or savoury dough. To safeguard the quality of proving, the function will not activate if the temperature in the oven is above 40°C. Place the dough on the 2nd shelf. The oven does not have to be preheated.	For keeping just-cooked food hot and crisp (e.g: meat, fried food or flans). Place food on the middle shelf. The function will not activate if the temperature in the oven is above 65°.	To speed up defrosting of food. Place food on the middle shelf. Leave food in its packaging in order to prevent it from drying out on the outside.	To switch the oven interior light on/off.	To halt cooking and switch off the oven.	FUNCTION SELECTOR KNOB

The cooking table advises the ideal function and cooking temperature to ensure the best results with all recipes. If you wish to cook on one shelf only using the fan-assisted function, place food on the third shelf and select the temperature recommended for the "FORCED AIR" (多) function when cooking on more than one shelf.

When grilling food, leave a space of 3-4 cm at the front to facilitate removal from the oven.

## **RECOMMENDED USE AND TIPS**

## How to read the cooking table

times start from the moment food is placed in the oven, excluding pre-heating (where required). Cooking temperatures and preferably dark coloured metal cake tins and oven trays. You can also use pans and accessories in pyrex or stoneware, but bear values to begin with and, if the food is not cooked enough, then move on to higher values. Use the accessories supplied and times are purely for guidance and will depend on the amount of food and type of accessory used. Use the lowest recommended The table indicates the best function to use for any given food, to be cooked on one or more shelves at the same time. Cooking for the choice of accessories (supplied) to be placed on the various shelves. in mind that cooking times will be slightly longer. To obtain best results, carefully follow the advice given in the cooking table

# Cooking different foods at the same time

food which requires longer cooking time in the oven. time (for example: fish and vegetables), using different shelves. Remove the food which requires less cooking time and leave Using the "CONVECTION BAKE" function, you can cook different foods which require the same cooking temperature at the same

### Desserts

- position of the cake tins on the shelves, aiding optimum circulation of the hot air. position them on the wire shelf supplied. To cook on more than one shelf, select the forced air function and stagger the Cook delicate desserts with the conventional function on one shelf only. Use dark coloured metal cake tins and always
- out clean, the cake is ready. To check whether a raising cake is cooked, insert a wooden toothpick into the centre of the cake. If the toothpick comes
- If using non-stick cake tins, do not butter the edges as the cake may not rise evenly around the edges
- mixture and mixing more gently. If the cake "sinks" during cooking, set a lower temperature the next time, perhaps reducing the amount of liquid in the
- For sweets with moist fillings (cheesecake or fruit pies) use the "CONVECTION BAKE" function". If the base of the cake is soggy, lower the shelf and sprinkle the bottom of the cake with breadcrumbs or biscuit crumbs before adding the filling.

#### Meat

- Use any kind of oven tray or pyrex dish suited to the size of the piece of meat being cooked. For roast joints, it is best to add some stock to the bottom of the pan, basting the meat during cooking for added flavour. When the roast is ready, let it rest in the oven for another 10-15 minutes, or wrap it in aluminium foil.
- thick pieces of meat require longer cooking times. To prevent the meat from burning on the outside, lower the position of the wire shelf, keeping the food farther away from the grill. Turn the meat two thirds of the way through cooking. When you want to grill meat, choose cuts with an even thickness all over in order to achieve uniform cooking results. Very

is placed. Top-up when necessary. To collect the cooking juices it is advisable to place a drip-tray with half a litre of water directly under the grill on which the meat

## Turnspit (only in some models)

when taking the food out of the oven. level. The rod has a plastic handle which must be removed before starting to cook, and used at the end of cooking to avoid burns support. To prevent smoke and to collect cooking juices, it is advisable to place a drip-tray with half a litre of water on the first and check that it is secure before inserting the rod in the seat located on the front wall of the oven and resting it on the respective Use this accessory to evenly roast large pieces of meat and poultry. Place the meat on the spit rod, tying it with string if chicken,

#### Pizza

cooking Lightly grease the trays to ensure the pizza has a crispy base. Scatter the mozzarella over the pizza two thirds of the way through

### Rising function

dough is around one hour. It is always best to cover the dough with a damp cloth before placing it in the oven. Dough proving time with this function is reduced by approximately one third compared to proving at room temperature (20-25°C). Proving time for a 1 Kg batch of pizza
